Academic Details

- Diploma – Computer Engineering**
Soniya Gandhi Polytechnic Shrigonda
- Bachelor of Engineering (B.E.)
Computer Engineering**
Universal College of Engineering Pune

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- Programming Languages:**
JavaScript, Python, Java
- Frontend:** React.js, HTML, CSS
- Backend:** Node.js, Express.js
- Database:** MongoDB, SQL
- Frameworks:**
React, Express
- AI / LLM Skills:**
Google Gemini integration, prompt engineering, AI-powered automation

Core Competencies

- Full-stack development
- Linux deployment
- Restful API
- Debugging
- AI automation

Personal Details

Date of Birth: 18th Nov 2006
Languages Known: English, Hindi and Marathi
Address: Shrigonda, Maharashtra

Profile Summary

- Full-stack developer experienced in MERN and modern JavaScript frameworks.
- Skilled in building scalable, user-friendly web applications.
- Strong in backend APIs, clean UI development, and cloud deployment.
- Integrates AI tools for automation and smarter workflows.
- Enhanced SSNLC Law College website with improved UI and structure.

Academic Projects

SSNLC Law College Website

June 2024 – March 2025

JavaScript, TypeScript, MongoDB HTML, CSS

A full-stack web platform built with Next.js and Express.js to provide students and faculty easy access to college information and services.

Responsibilities:

- Developed the complete frontend using Next.js, including routing, UI components
- Built backend APIs with Express.js for handling content, requests, and server-side logic.
- Structured the project with separate client and server modules for clean maintainability.
- Integrated frontend and backend through efficient API communication.
- Prepared production build and deployment setup, including server configuration, domain linking, and SSL.
- Source Code:** [GitHub](#), **Live Link:** [ssnlc.in](#)

Uber Clone

June 2023 – March 2024

Tools: React, Node, Docker, Arduino Programming

A device which sits inside a conventional switch board and makes normal appliance – Smart using IoT protocols.

Responsibilities:

- Designed and developed RESTful APIs for user management, ride requests, and driver workflows using **Node.js** and **Express.js**.
- Implemented database schemas and operations with **MongoDB Atlas** and **Mongoose**.
- Added request validation and security layers using **express-validator** and environment-based configuration with **dotenv**.
- Structured the backend for scalability and easy integration with a future mobile/web frontend.
- Prepared the project for deployment and local development with clear installation and environment setup.
- Source Code:** [GitHub](#)

Academic Achievements

- Improved the UI of college website to include a separate page for Alumni and Teacher
- Improved the SSNLC Law College website by enhancing UI, structure, and accessibility.
- Built a full-stack college platform using Next.js and Express.js as part of academic development.
- Developed multiple backend systems, including an Uber Clone API using Node.js and MongoDB.
- Created a Java-based Bakery Management System for streamlined inventory and billing operations.
